In connection with this reissue, the papers have been affixed together and they comprise:

1. The reissue specification (including the claims);
2. A Petition (including offer to surrender patent), Declaration and Power of Attorney of the inventor;
3. Assent of Assignee, executed by authorized representatives of Ethyl Corporation, the owner of all right, title and interest in and to U.S. patent 4,912,155;
4. A Request Under 37 C.F.R. 1.171 for an abstract of the title to the above-identified Patent No. 4,912,155;
5. An offer to surrender the original letters patent. As provided therein, the original letters patent will be surrendered in due course, pursuant to 37 CFR 1.178, upon the U.S. Patent and Trademark Office finally providing the same to the patentee or assignee;
6. Declaration of J.D. Odenweller under 37 C.F.R. 1.175(b); and
7. Information Disclosure Statement Under 37 C.F.R. 1.97, together with a copy of the cited references including such translations of the foreign-language documents as are available to applicants.

No drawing is required.

The reissue application seeks to enlarge in part and limit in part claim 1, and better define the invention in claim 6 and 8. Also, the enclosed specification corrects certain typographical errors which arose in the printing of the original patent and deletes a portion of the specification.

It is respectfully requested that the above-identified patent be reissued to the assignee, Ethyl Corporation.

Kindly send us the official filing receipt.
